SECTION 7 - EMERGENCY/CRISIS/DISASTER/RESTORATION AND PROVISIONING – TELECOMMUNICATIONS SERVICE PRIORITY

7.1. GENERAL

The Telecommunications Service Priority (TSP) Program is a federal program used to identify and prioritize telecommunications services that support national security or emergency preparedness (NS/EP) missions.

NS/EP services are defined as those telecommunications services which are used to maintain a state of readiness or respond to and manage any event or crisis which causes or could cause injury or harm to the population, damage or loss to property, or degrades or threatens the NS/EP posture of the United States.

TSP restoration and/or provisioning shall be provided in accordance with Part 64, Appendix A of the Federal Communications Commission's Rules and Regulations (47 C.F.R.), and the "Service Vendor Handbook For The Telecommunications Service Priority (TSP) Program" and the "Service User Manual for the Telecommunications Service Priority (TSP) System" (NCS Manual 3-1-1) (Service User Manual) issued and updated as necessary by the Office of Priority Telecommunications (OPT) of the National Communications System. Any changes to or reissuance of these regulations or manuals supersede Tariff language contained herein.

7.2. TSP PROGRAM COMPONENTS

The TSP program has two components, restoration and provisioning.

1. A restoration priority is applied to new or existing telecommunications services to ensure restoration before any other services during a service outage. TSP restoration priorities must be requested and assigned before a service outage occurs.
2. A provisioning priority is obtained to facilitate priority installation of new telecommunications services during a service outage. Provisioning on a priority basis becomes necessary when an end-user has an urgent requirement for a new NS/EP service that must be installed immediately or by a specific due date that can be met only by a shorter than standard or expedited Company provisioning time frame. As a matter of general practice, existing TSP services will be restored before provisioning new TSP services.

SECTION 7 - EMERGENCY/CRISIS/DISASTER/RESTORATION AND PROVISIONING – TELECOMMUNICATIONS SERVICE PRIORITY, Continued

7.3. TSP REQUEST PROCESS – RESTORATION

To request a TSP restoration priority assignment, a prospective TSP user must:

1. determine that the user's telecommunications service supports an NS/EP function under one of the following TSP categories.
 - a. National Security Leadership
 1. National Security Posture and U.S. Population Attack Warning
 2. Public Health, Safety, and Maintenance of Law and Order
 3. Public Welfare and Maintenance of National Economic Posture.
2. identify the priority level to be requested for the telecommunications service. The priority level is determined by the end-user's TSP category and service profile. The service profile defines the user's level of support to the portion of the telecommunications service that the user owns and operates, such as Customer Premises Equipment or wiring. The five levels of priority and seven element groups that define the service profile are contained in the Service User Manual.
3. Complete the TSP Request for Service Users form (SF 315) available on the National Communications System (NCS) website (<http://tsp.ncs.gov/>).
4. For non-federal users, have their TSP requests approved by a federal agency sponsor. Non-federal users should contact the OPT, at the NCS website (<http://tsp.ncs.gov/>), for information on identifying a sponsor for TSP requests.
5. Submit the SF 315 to the OPT.
6. Upon receipt of the TSP Authorization Code from the OPT, notify the Company, and include the TSP Authorization Code in any service order to the Company requesting restoration of NS/EP services.

SECTION 7 - EMERGENCY/CRISIS/DISASTER/RESTORATION AND PROVISIONING – TELECOMMUNICATIONS SERVICE PRIORITY, Continued

7.4. TSP REQUEST PROCESS – PROVISIONING

To request a TSP provisioning priority assignment, a prospective TSP user must follow the same steps listed above for restoration priority assignment except for the following differences. The user should:

1. certify that its telecommunications service is an Emergency service. Emergency services are those that support one of the NS/EP functions listed above and are so critical that they must be provisioned at the earliest possible time, without regard to cost to the user.
2. verify that the Company cannot meet the service due date without a TSP assignment.
3. obtain approval from the end-user's invocation official to request a provisioning priority. Invocation officials are designated individuals with the authority to request TSP provisioning for a telecommunications service, and include the head or director of a federal agency, commander of a unified/specified military command, chief of a military service, commander of a major military command, or state governor.

SECTION 7 - EMERGENCY/CRISIS/DISASTER/RESTORATION AND PROVISIONING – TELECOMMUNICATIONS SERVICE PRIORITY, Continued

7.5. RESPONSIBILITIES OF THE END USER

End-users or entities acting on their behalf must perform the following:

1. Identify telecommunications services requiring priority.
2. Request, justify, and revalidate all priority level assignments. Revalidation must be completed every 2 years, and must be done before expiration of the end-user's TSP Authorization Code(s).
3. Accept TSP services by the service due dates.
4. Have Customer Premises Equipment (CPE) and Customer Premises Wiring (CPW) available by the requested service due date and ensure (through contractual means or otherwise) priority treatment for CPE and CPW necessary for end-to-end service continuity.
5. Pay the Company any authorized costs associated with priority services.
6. Report to the Company any failed or unusable services with priority levels.
7. Designate a 24-hour point of contact for each TSP request and apprise the OPT.
8. Cooperate with the OPT during reconciliation (comparison of NS/EP service information and resolution of any identified discrepancies) and revalidation.

SECTION 7 - EMERGENCY/CRISIS/DISASTER/RESTORATION AND PROVISIONING – TELECOMMUNICATIONS SERVICE PRIORITY, Continued

7.6. RESPONSIBILITIES OF THE COMPANY

The Company will perform the following:

1. Provide TSP service only after receipt of a TSP authorization code.
2. Revoke TSP services at the direction of the end-user or OPT.
3. Ensure that TSP Program priorities supersede any other telecommunications priority that may be provided (other than control services and order wires).
4. Designate a 24-hour point of contact to receive reports of TSP service outages from TSP service users.
5. Designate a 24-hour point of contact to coordinate TSP processes with the OPT.
6. Confirm completion of TSP service order activity to the OPT.
7. Participate in reconciliation of TSP information at the request of the OPT.
8. Ensure that all subcontractors complete reconciliation of TSP information with the service vendor.
9. Ensure that other carriers supplying underlying facilities are provided information necessary to implement priority treatment of facilities that support NS/EP services.
10. Assist in ensuring that priority level assignments of NS/EP services are accurately identified "end-to-end" by providing to subcontractors and interconnecting carriers the restoration priority level assigned to a service.
11. Disclose content of the NS/EP TSP database only as may be required by law.
12. Comply with regulations and procedures supplemental to and consistent with guidelines issued by the OPT.

7.7. PREEMPTION

When spare facilities are not available, it may be necessary for the Company to preempt the facilities required to provision or restore a TSP service. When preemption is necessary, non-TSP services may be preempted based on the Company's best judgment. If no suitable spare or non-TSP services are available, the Company may preempt an existing TSP service to restore a TSP service with a higher restoration priority assignment. When preemption is necessary, prior consent of the service user whose service will be preempted is not required; however, the Company will make every reasonable effort to notify the preempted Customer of the action to be taken.

SECTION 8 – CRITICAL FACILITIES ADMINISTRATION SERVICE

8.1. PROGRAM OVERVIEW

Facilities-based carriers are responsible to provide data on the physical path of qualified circuits to customers who request such information. Such carriers are required to maintain facilities associated with qualified circuits in such a manner as to ensure that notification of a change in the physical routing of a qualifying circuit is communicated quickly to the affected customer, and the physical path data promptly updated. Such carriers will maintain the data and establish appropriate methods of identification and authentication to secure the data and restrict access by each customer to information relative to that customer's qualifying circuits.

Customers are required to demonstrate for each qualifying circuit that the circuit has been registered under the federal Telecommunications Service Priority program in order to participate.

8.2. CUSTOMER RESPONSIBILITIES

Customers participating under the Critical Facilities Administration program will be required to:

- 8.2.1. Identify critical facilities by enrolling circuits in the federal Telecommunications Service Priority program, and demonstrating the sponsorship of a federal agency supporting the designation of those circuits as qualifying under the federal Telecommunications Service Priority program. Such circuits will be referred to as "qualifying circuits."
- 8.2.2. Subscribe to the Critical Facilities Administration service offered by their carrier, and identify which qualifying circuits it wishes to enroll in the service. Such circuits will be referred to as "subscribed circuits."

SECTION 8 – CRITICAL FACILITIES ADMINISTRATION SERVICE, Continued

8.3. CARRIER OBLIGATIONS

Facilities-based carriers will be obligated to identify the physical path of each subscribed circuit as follows:

- 8.3.1. Physical path information will be provided by reference to the latitude and longitude coordinates of suitable points along the circuit's path (e.g., cable entrances to buildings, manholes, riser poles, cross boxes, carrier equipment cabinets, and other circuit access points in the outside plant of the carrier) so as to allow the customer to ascertain with a reasonable degree of accuracy the actual physical path of each subscribed circuit.
- 8.3.2. Physical path information for newly provisioned subscribed circuits is to be available to the customer within 5 business days after the circuit has been installed, and within 15 business days for existing, in-place subscribed circuits.
- 8.3.3. Any planned moves, changes, or rearrangements that affect the physical path of a subscribed circuit are to be communicated at least 24 hours in advance to the customer, and information related to a move, change, or rearrangement that was as a result of unplanned activity is to be provided within 24 hours of the change.
- 6.3.4. Updated information regarding the revised physical path of subscribed circuits would be available to the customer within 5 business days for planned actions, and within 15 business days for unplanned activities.
- 8.3.5. Provision of the service would be suspended altogether in the instance of a major telephone outage. Once restored to service, current physical path information for a subscribed circuit would be developed and made available to the customer within ninety days of the restoration of service.
- 8.3.6. The carrier must establish a secure database or other means that would allow the customer to obtain information of the physical path for only its subscribed circuits, subject to appropriate authentication and authorization. Where practicable, the information should be made available on a 24 hour by seven-day basis.

8.4. RATES

Rates for CFA are based upon the time required to collect the circuit path data. The company will give the customer a good faith estimate of the time period needed to perform the requested service. The customer will be billed those charges, along with the charges established by any connecting carrier for the service.
